

INCIDENT MANAGEMENT SITUATION REPORT
 THURSDAY, JULY 20, 2000 - 0530 MDT
 NATIONAL PREPAREDNESS LEVEL III

CURRENT SITUATION:

Initial attack activity diminished somewhat in most areas yesterday. New large fires were reported in the Western Great Basin, Eastern Great Basin, Rocky Mountain, Northwest, and Southern Areas. Lightning-ignited holdovers are likely to appear today in eastern Oregon, Idaho and western Montana as hot, dry weather returns. Aircraft, crew, equipment and overhead mobilization through the National Interagency Coordination Center continued at a moderate pace. Very high to extreme fire danger indices were reported in Oregon, Washington, California, Montana, Idaho, Utah, Nevada, Arizona, New Mexico, Colorado, Wyoming, and Alabama.

EASTERN GREAT BASIN AREA LARGE FIRES:

A Type II Incident Management Team (Saleen) is staging in Salmon, Idaho.

CLEAR CREEK, Salmon-Challis National Forest. A Type I Incident Management Team (Carvalho) is assigned. This fire is northwest of Salmon, ID. Active burning is occurring in pockets on the south and east sides of the fire, but spread is minimal. Rolling material in steep terrain is slowing fireline construction. Other deterrents to containment include extremely dry fuels and limited access.

BURGDORF JUNCTION, Payette National Forest. A Type I Incident Management Team (Hefner) is assigned. The fire is 27 miles north of McCall, ID. Isolated torching continues on the interior of the fire. Residences, a fire lookout, salmon habitat, and watershed values are threatened. Crews are making significant progress constructing fireline.

BARE CANYON, Targhee National Forest. This timber fire is 32 miles west of Dubois, ID. The fire received precipitation; minimal fire activity was observed. Fireline construction and mopup are ongoing.

SANDAL, Northwest Utah State. This fire is 35 miles west of Logan, UT near the Golden Spike National Monument. Shifting winds are causing numerous directional changes on the fire. Observed fire behavior includes torching, running and crowning.

DOPPLER, Northwest Utah State. This fire is 24 miles west of Ogden, UT. Shifting winds, low relative humidities and torching are hampering containment efforts. Crews are mopping up the lower elevations of the fire.

WESTERN GREAT BASIN AREA LARGE FIRES:

BILK CREEK COMPLEX, Winnemucca Field Office, BLM. A Type I Incident Management Team (Hutchison) is assigned. The fires are burning in grass and sagebrush 50 miles north of Winnemucca, NV. Fires in the complex include Dry Creek, Cherry Creek, Riverside, Double H, Garden Springs, Willow Creek, and Sod House. Crews have been able to hold all firelines, and demobilization of excess resources will begin today.

PRINCE ROYAL COMPLEX, Winnemucca Field Office, BLM. A Type II Incident Management Team (Suwyn) is assigned. These fires are burning in grass and sagebrush three miles south of Imlay, NV. Crews are making good progress constructing fireline. Current threats are to residences, outbuildings, a communication tower and mine properties. Active burning in cured grass and the presence of abandoned mines are causes for concern.

BEOAWAW, Elko Field Office, BLM. A Type II Incident Management Team (Ostman) is assigned. This fire is burning in grass and sagebrush 40 miles west of Elko, NV. The fire crossed Brook Creek and Buckhorn Mine Road. Direct attack of the head and west flank of the fire is not possible due to steep terrain. Challenges to containment include extreme fire behavior and very hot and dry conditions with no improvement in the forecast.

AURORA, Humboldt-Toiyabe National Forest. This lightning-caused fire is burning northeast of Bridgeport, CA near the Aurora Mine. The forward spread of the fire has been halted. Some spot fires are still occurring. Crews and dozers are making progress on fireline construction.

BERNDT, Battle Mountain Field Office, BLM. This fire is north of Austin, NV. Fuels are sagebrush, pinyon pine and juniper. Moderate fire behavior is occurring with some torching and running observed. The fire was ignited by lightning.

NORTHERN ROCKIES AREA LARGE FIRES:

A Type II Incident Management Team (Swope) is managing the staging area in

Missoula, MT.

LITTLE BLUE, Bitterroot National Forest. A Type I Incident Management Team (Frye) is assigned. This fire is 25 miles southwest of Darby, MT. The fire received some light rain and thunderstorm activity. The evacuation request is still in place from Mud Creek to the Alta Campground, but most residents have returned. Obstacles to containment include rugged terrain and difficulty in securing anchor points on the west half of the fire.

SEELEY COMPLEX, Lolo National Forest. A Type II Incident Management Team (Corbin) is assigned. This is a complex of 16 fires which are 34 miles northeast of Missoula in the Seeley Lakes area. Two new fires have been added to the complex. Crews were pulled off the fireline on two of the fires, due to concerns regarding escape routes, safety zones and falling snags. Lack of road access to the fires is slowing suppression efforts.

CLEARWATER COMPLEX. Southwestern Land Office, Montana Department of Natural Resources and Conservation. A Type II Incident Management Team (Specht) is assigned. This complex consists of 44 fires which are 17 miles southeast of Seeley Lake, MT. Dry lightning passed through the area and five new fires have been ignited within the complex. Crews are engaged in aggressive mopup on the staffed fires. Twenty fires are in patrol status.

ROCKY MOUNTAIN AREA LARGE FIRES:

CITADEL, Craig District, BLM. This fire is burning in pinyon pine, juniper and sagebrush 16 miles northwest of Meeker, CO. A burnout is planned to protect threatened ranch buildings, livestock and private grazing land. Containment problems include strong shifting winds, low relative humidities, heavy fuel loading, and extremely dry fuels.

RED CANYON, Rawlins District, BLM. This fire is near Lander, WY. It is burning in thick sagebrush and grass. Several nearby structures are threatened.

COTTONWOOD DIVIDE, Rawlins District, BLM. This fire is burning in pinyon pine, juniper and sagebrush near Lander, WY. Threats are to several historical structures.

JUNIPER 2, Craig District, BLM. This fire is near Craig, CO. High winds and low relative humidities continue to cause problems. Containment was expected late last night.

NORTHWEST AREA LARGE FIRES:

ALDERDALE, Washington State Lands. The fire is burning in sagebrush fuels in Klickitat County. The fire jumped firelines on the northwest corner yesterday and threatened wheat fields, crop lands and adjacent structures. Steep terrain, winds generated by the Columbia River Canyon and low afternoon humidities are impeding containment.

WHITE RIDGE #1, Southeast Washington State Forestry. A Type II Incident Management Team (Johnson) is assigned. This fire is 35 miles west of Yakima, WA. The fire was caused by a lightning strike on 7/17. Current threats are to timber, slash and a watershed. Isolated torching and spotting are a concern.

2 HORSE MOUNTAIN, Prineville District, BLM. The fire, which was ignited by lightning on 7/18, is burning in grass, sagebrush, pinyon pine and juniper 45 miles northeast of Prineville, OR. Precautionary evacuation of Pine Creek Ranch and Camp Hancock has taken place. Observed fire behavior includes short range spotting, torching and running in draws. A portion of the fire is within the Sheep Basin Wilderness Study Area.

NORTHERN CALIFORNIA AREA LARGE FIRES:

GOAT, Lassen-Modoc Ranger Unit, California Department of Forestry. This fire is burning in timber with brush understory eight miles northwest of Susanville, CA. Evacuation orders are in effect for the Lake Forest Estates subdivision. The head of the fire is still active and numerous spot fires have been suppressed.

OUTLOOK:

*** A RED FLAG WARNING IS POSTED IN CENTRAL ALABAMA FOR LOW HUMIDITIES AND THE PASSAGE OF A DRY COLD FRONT ***

*** A FIRE WEATHER WATCH IS POSTED IN NORTHEAST OREGON FOR DRY LIGHTNING ***

*** A FIRE WEATHER WATCH IS POSTED IN SOUTHEAST ALABAMA AND THE INLAND FLORIDA PANHANDLE FOR LOW RELATIVE HUMIDITIES ***

Monsoon moisture moving northeast across Colorado will produce scattered showers and thunderstorms. Lingering moisture from northern Oregon across central Idaho east to Montana will produce widely scattered afternoon thunderstorms. Lower level dryness and above normal temperatures will keep the fire danger high.

Eastern Oregon, eastern Washington, Idaho, and Nevada will be mostly sunny. There is a chance of afternoon high-based thunderstorms in central Idaho and northeast Oregon. High temperatures will be in the mid 80's to mid 90's in the valleys and in the upper 70's and 80's in the mountains. Winds will be southwest to northwest at 5 to 15 mph. Minimum relative humidities will range from 5 to 20 percent.

Montana and Wyoming will be partly cloudy with scattered afternoon showers and thunderstorms. High temperatures will be in the mid 80's to lower 90's at lower elevations and from the mid 70's to lower 80's in the mountains. Winds will be variable at 5 to 15 mph. Minimum relative humidities will be from 20 to 35 percent.

Utah will be mostly sunny. High temperatures will be in the 80's and 90's, with a high near 106 in the desert areas. Winds will be upslope and up valley at 5 to 15 mph. Relative humidity will be 3 to 13 percent in

deserts and 10 to 20 percent elsewhere.

Colorado will be partly cloudy with widely scattered afternoon showers and thunderstorms. High temperatures will be in the 70's and 80's in the mountains and up to the 90's at lower elevations. Minimum relative humidities will be from 15 to 30 percent. Upslope and up valley winds will be 5 to 15 mph.

Florida will be partly to mostly cloudy with a chance of thunderstorms. High temperatures will range from the mid 80's to near 103 in the panhandle. Winds will be south to west at 5 to 15 mph. Minimum relative humidities will be 30 to 40 percent in the panhandle area, and 50 to 70 percent elsewhere.

Alabama will be partly cloudy with a chance of thunderstorms. High temperatures will be in the 90's. Winds will be north at 5 to 15 mph. Minimum relative humidities will be around 30 percent.
